

Maximize Your Savings by Combining Rebates

Heating and cooling can account for nearly 50% of your annual energy costs. Having an efficient HVAC system can help keep those costs down. The Ameren Missouri Heating and Cooling Program offers rebates on new HVAC equipment that can help you save energy, lower your bill and make your home more comfortable. When you install qualifying, energy efficient heating and cooling equipment, not only will you use less energy, but you can earn significant rebates to help make the installation more affordable. By taking advantage of the Ameren Missouri rebate along with manufacturer and other rebates, you can maximize your savings.

Ameren Missouri Heating and Cooling Rebates

Single-family and multifamily residential electric customers living in the Ameren Missouri service area are eligible for a variety of rebates that are effective for equipment installation on or after January 1, 2022, including:

Central Air Conditioner:	up to \$700*
Air-Source Heat Pump:	up to \$900*
Ductless Air-Source Heat Pump:	up to \$500*
Geothermal Heat Pump:	up to \$1,800*
Smart Thermostat:	\$100*
